DELTA 355 TRAILER

The **DELTA 355 TRAILER** is a self-aligning hydraulic mirror welding machine, suitable for welding pressure pipes for water, gas and other liquids, for diameters **125 to 355 mm.** This aircraft operates according to the international standards ISO 21307 HIGH PRESSURE and ASTM F2620. The **DELTA 355 TRAILER** does not have a generator on board and needs external power supply.

The **DELTA 355 TRAILER** includes:

- a mirror welding machine mounted on a trailer,with aremovable machine body for working in tight spaces, with chip collector.

- the "Smart-lock" locking system that allows the inserts to be changed in a few seconds.

- an electric flat planer, on board the machine, equipped with a safety switch to prevent accidental starting, a thermal circuit breaker to protect the engine, an ergonomic dockingsystem, on/off switches and a gas spring to easily lift/lowerthe surface planer.

- an integrated heating plate, on board the machine, with Teflon coating (PTFE), protective frame, insulated protective bag and gas spring to easily lift/lower the heating plate

- a locking system for the heating plate and flat planer for safe transport.

- a detachable "Easy Life"control panel. This panel (which also works with the "Set & Go PRO" app) controls the welding phases and allows the operator to program and control all welding cycles in a simple and intuitive way. It also controls the temperature of the heating plate, which is always visible on the display. It includes a GPS and data logging system to store the welding data. The "Easy Life" system can store up to 4000 welding reports and can pre-set up to 20 custom welding cycles. The USB port is used for downloading welding reports in PDF via a printer or for uploading an upgrade.

- a tow bar designed to weld between the 3rd and 4th clamp.

- twee hydraulic rollers for loading and unloading pipes.
