

OMEGA 630-315

The **OMEGA 630-315** mirror welding machine is suitable for use in the workshop to manufacture special parts, such as reduced branches, tees and crosses.

The machine contains:

- Machine house with manual carriage for centering
- Hydraulic clamps for securing main tube and branch
- Side support for branches
- Quick-release inserts
- EASY LIFE control panel: enables an easy-to-repeat welding cycle, eliminating operator intervention
- A built-in memory records 4000 welding cycles. The data is available via PDF reports, downloadable on a USB stick
- Ability to pre-set 20 custom parameters
- Hydraulic movement of the heating plate
- Branch drill (to make T-pieces) (on request)

Can be combined with the **RADIUS 40-315** (machine for radial sawing)
