

THE INSPECTOR

"**THE INSPECTOR**" is a **data logging unit** that monitors the entire welding process, records it and generates a PDF report. The **INSPECTOR** is an "open system" that can be used with Ritmo machines (or other brands). The large graphic display makes reading welding reports easy.

The device contains:

- A hard case in PP, with protection class IP 67
- A carrying case with battery charger with international adapters
- Important welding standards (ISO, DVS,...) have already been charged in memory
- Memory of 1000 cycles
- A USB port for welding reports in PDF and firmware upgrades
- An integrated GPS
- Battery operated (operational for 24 hours)
- Applicability to Ritmo machines and other brands
