

ALIGNER ECO 20-63

The **ALIGNER ECO 20-63** is an essential and professional tool for the alignment of pipes during electro-welding. It is composed of 2 aluminum shafts with self-centering steel clamps. The clamps can easily be moved along the length of the shaft. A positioning plate allows welding in 30°, 45°, 90° and tees with diameters between **20 and 63mm**.

The clamping of the tubes is done via cable ties (included) with closure and "quick release".
The aligner is versatile and easy to use.

TECHNICAL DATA

		ALIGNER ECO 20-63
Diameter range	∅	20 - 63 mm
Max. dimensions 2 axes	L x W x H	640 x 120 x 83 mm
Max. dimensions 3 axis	L x W x H	-
Weight 2-axle	Kg	3 kg
Weight 3-axle	Kg	-
