

DELTA 630 TRAILER

The **DELTA 630 TRAILER** is a self-aligning hydraulic mirror welding machine, suitable for welding pressure pipes for water, gas and other liquids, for diameters **225* up to 630 mm**. This aircraft operates according to the international standards ISO 21307 HIGH PRESSURE and ASTM F2620. The **DELTA 630 TRAILER** has no generator on board and needs external power.

The **DELTA 630 TRAILER** includes:

- a mirror welding machine mounted on a 4-wheel chassis, with 2 steering wheels and handbrake, with removable machine body to work in tight spaces.
- steel hydraulic clamps with the "Smart-lock" locking system that allows the inserts to be changed in a few seconds.
- an electric flat planer, on board the machine, equipped with a safety switch to prevent accidental starting, a thermal circuit breaker to protect the engine, an ergonomic docking system, and on/off switches.
- an integrated heating plate, on board the machine, with Teflon coating (PTFE), protective frame, insulated protective bag.
- a detachable "Easy Life" control panel. This panel (which also works with the "Set & Go PRO" app) controls the welding phases and allows the operator to program and control all welding cycles in a simple and intuitive way. It also controls the temperature of the heating plate, which is always visible on the display. It includes a GPS and data logging system to store the welding data. The "Easy Life" system can store up to 4000 welding reports and can pre-set up to 20 custom welding cycles. The USB port is used for downloading welding reports in PDF via a printer or for uploading an upgrade.
- a sleeperspliers designed to weld between the 3rd and 4th clamp.
- two lateral rollers, to be operated with a cordless drill.
