

Kela

KELA is a universal and compact aligner suitable for plastic pipes, fittings and electro-welding saddles, with a range of **16-63mm**. Thanks to the special clamp design, it is possible to align pipes and fittings in a straight position or below 45° and 90°.

KELA is equipped with two plates: one wide and one narrow. The wide plates are used for straight alignment, they give better grip and positioning. The narrow plates are more compact and therefore easier to use for the 45° and 90° applications.

Incl. transport bag

TECHNICAL DATA

		KELA 16-63
Diameter range	∅	16 - 63 mm
Type of alignment		straight, 45°, 90°
Largest size	L x W x H	298 x 126 x 153 mm
Smallest size	L x W x H	206 x 155 x 104 mm
Dimensions transport bag	L x W x H	400 x 180 x 130 mm
Weight	Kg	1.4 kg
Weight incl transport bag	Kg	2 kg
