

UNIVERSAL ALIGNER 160 LIGHT

This professional tool is essential to keep pipes aligned during electro-welding from \varnothing 63 to 160mm. The "**UNIVERSAL ALIGNER 160 LIGHT**" is almost entirely made of a special alloy and can be moved centrally to form 45° and 90° angles. It has 4 self-centering clamps that do not require adapters and on request an additional shaft with 2 clamps to weld tees. The special "quick release" clamps allow a quick extraction of the tube after the weld.

This unit includes:

- 4-terminal aligner
- transport bag or wooden transport box
