

ALIGNER ECO 63-180

The **ALIGNER ECO 63 -180** is an essential and professional tool for the alignment of pipes during electro-welding from **Ø 63 to 180 mm**. This aligner is made entirely of steel, with a centrally adjustable connection and tube clamps, fastened to the shafts. The adjustable connection can be placed in 4 different positions to weld 30°, 45°, 90°, "inline" and tees.

V-shaped clamps are positioned on the axes, which are equipped with closing straps. The system can also serve as a centering device. Each shaft has 2 guides on which the clamps can slide back and forth.

Convenient side grips ensure easy handling during transport and positioning, both during the welding process and preparation.

The aligner is available in 2 configurations: 2 axes and 3 axes (for welding tees).

TECHNICAL DATA

		ALIGNER ECO 63-180
Diameter range	∅	63 - 180 mm
Max. dimensions 2 axles	L x W x H	915 x 140 x 130 mm
Max. dimensions 3 axis	L x W x H	915 x 575 x 130 mm
Weight 2-axle	Kg	7.5 kg
Weight 3-axle	Kg	10 kg
